

Frequently Asked Questions

Who orders Decipher Prostate?

The test is ordered by your doctor or healthcare provider.

How long does it take to get my Decipher Prostate test results?

Results are sent to your doctor about 2-3 weeks from the order date, and your doctor will review them with you.

Does Decipher Prostate test my DNA?

No. The test does not analyze your inherited DNA. Instead, it evaluates the gene activity (RNA expression) of your tumor to understand how aggressive the cancer may be and how it might behave.

Who is Decipher Prostate for?

The test is for people with localized or metastatic prostate cancer who have not received hormone or radiation therapy before their sample was collected.

What information is used to determine my Decipher score?

Your score is based on the combined activity of 22 genes in your tumor and does not include other clinical measures such as PSA or Gleason score.

Guidelines & Coverage

- Included in the national guidelines for prostate cancer
- Covered by **Medicare & major insurance plans throughout the U.S.** for beneficiaries with localized and advanced prostate cancer
- Financial assistance and flexible payment options are available through the **Veracyte Access** program for commercially insured and self-pay patients

Learn more about the Veracyte Access program:

Household Size	Cost to Patient		
	\$0	\$100	\$295
1	\$46,950	\$54,775	\$62,600
2	\$63,450	\$74,025	\$84,600
3	\$79,950	\$93,275	\$106,600
4	\$96,450	\$112,525	\$128,600
5	\$112,950	\$131,775	\$150,600
2026 maximum household income*			

*Veracyte Access eligibility is based on total annual household income, insurance status, and household size. Some eligibility restrictions apply. Veracyte offers certain Decipher tests at a reduced cost to eligible applicants except where otherwise restricted. Residents of the United States, District of Columbia and Puerto Rico are eligible to apply. Veracyte Access does not constitute health insurance. You must meet certain income requirements set forth above. We may request documentation to verify your income, including recently filed tax returns and other supporting documentation. By requesting assistance, you certify, to the best of your knowledge, that you are eligible for assistance and that you have insufficient financial resources to pay for the ordered test. We may discontinue or change this program at any time for any reason without notice.

What is the Decipher Prostate test?

- A genomic tissue test that helps guide your prostate cancer treatment
- Uses existing biopsy or surgery tissue; no additional procedures required
- Analyzes 22 genes to estimate how likely the cancer is to spread
- Provides a score (0–1), with results explained in a personalized report

A **higher score** reflects a more aggressive tumor, and a **lower score** reflects a less aggressive tumor.

Why did my doctor order Decipher Prostate?

When planning your prostate cancer care, your doctor looks at key details, such as:

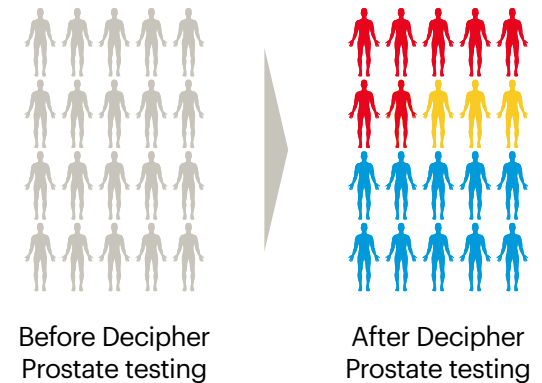

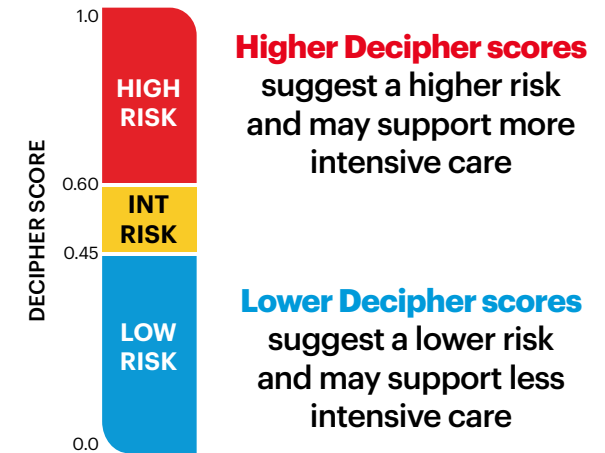

- » Gleason score
- » PSA level
- » Clinical stage

These factors don't always capture how the cancer will behave.

The Decipher Prostate test provides additional information about the biology of your tumor to help inform your care.

How will my Decipher Prostate test results be used?

Talk with your doctor about your Decipher Prostate results.
